Degree Plan Started On: _____

Degree Plan Expires On: _____

This degree plan is not official until signed by the Office of the Registrar. Any errors noted on this evaluation must be reported immediately to the Registrar's Office. **Read your catalog.**

Most of the above classes have prerequisites. Students should take Introduction to Animal Science first. Animal Nutrition I should be taken second. Ideally, students should take Animal Reproductive Physiology, Animal Breeding, and Forage Production and Management before taking the two production courses. If the student needs to deviate from this process, they should discuss it with the Instructor.
